

After flood:

(Mix 4 tbsp of bleaching powder in 1 ltr water) and also to disinfect your surrounding.

- Maintain general cleanliness and hygiene. Bring drinking water to a rolling boil for 1 minute. Boil your vegetables and greens properly. Keep your food covered. Clean cookware and other utensils after use. Use soaps to wash hands before eating and after using toilets.
- Ensure hygienic disposal of human and animal excreta and garbage.
- In case of diseases such as diarrhoea, jaundice, malaria etc. associated with contamination of water and creation of mosquito breeding sites during flood, contact your ANM / AWW for ORS and treatment immediately.

Flood Safety Measures

Are you prepared for
the Floods this season ?

Ensure your safety by knowing what to do...
